21th CAPRI SPRING SCHOOL ON TRANSPORT IN NANOSTRUCTURES

April 18-25, 2027

Invited speakers

Rainer Blatt (Innsbruck)

Pasquale Calabrese (Trieste)

Andrea Caviglia (Geneve)

Michel Devoret (Santa Barbara)

Christopher Eichler (Erlangen)

Marcelo Goffman (Paris-Saclay)

Corinna Kollath (Bonn)

Anja Metelmann (KIT)

Achim Rosch (Cologne)

Simon Trebst (Cologne)

This one-week spring school will offer a series of lectures by leading experts, complemented by selected seminars. This edition will focus on **Modern trends in nonequilibrium many-body quantum dynamics**. The lecturers will present graduate-

level talks introducing state-of-the-art methods and techniques, highlighting recent progress in the field. While the school is mainly intended for graduate students and young postdoctoral researchers, master's students and more senior scientists interested in

the subject are also welcome. The school will take place over five days, from April 19 to 23. On Saturday, April 24, there will be an excursion to Pompeii. Fellowships for PhD and master's students working in the field are available upon request.

Registration:

www.capri-school.eu
Deadline: 31.01.2027.
